

School of Engineering

EN

Approved by the Faculty Assembly on June 9, 1970:

"That the policy of the School of Engineering and Applied Science regarding ROTC be modified by replacing paragraph 1 on page 49 of the 1969-70 bulletin of the School with the following:

' Students in the School of Engineering and Applied Science taking ROTC courses will have the course name, number, credits, and grade entered on their official transcript. These courses are taken on an overload basis and credits and grades do not contribute to the fulfillment of degree requirements.' "

These resolutions were passed at the April 13, 1970 Faculty Assembly meeting.

Resolution #1

The Faculty of the School of Engineering and Applied Science urges the Board of Trustees and the Chancellor to take whatever steps are feasible to ensure that an R.O.T.C. program is available to those University students who wish to participate in the program.

Resolution #2

The Faculty of the School of Engineering and Applied Science believes that the central issue at stake at the present time is the continued existence of a non-politicized University. The Faculty also believes that the present tactics of disruption of classes, personal harassment and intimidation of selected individuals, sporadic violent attacks on University buildings, and confrontations with legal authority are related directly to this central issue.

The Faculty therefore strongly urges the Chancellor of the University to take the steps necessary to maintain order on the campus, to protect the students and teachers in all scheduled University classes from harassment and abuse, to protect the civil rights of all persons while on the University campus, and to guard against violent attacks on University buildings which endanger both life and property.

ROTC Courses and Degree Credit

Current rules: (page 268, 1994-6 Undergraduate Bulletin)

"A student in the School of Engineering and Applied Science who takes an ROTC course will have the course name, number, credit units, and grade entered on the official transcript. If a student completes the ROTC sequence, 3 units may be credited toward the degree as a free elective. Grades in ROTC courses do not affect the student's grade-point average."

Proposed rules:

"A student in the School of Engineering and Applied Science who takes an ROTC course will have the course name, number, credit units, and grade entered on the official transcript. If the course is numbered 100-299, the course's units and grade will not apply towards the student's degree requirements; if the course is numbered 300-499 and the grade is D- or better, the course's units will apply toward the student's degree requirements(as a free elective), but the grade will not affect the student's cumulative or semester grade-point-average."
